

Welcome LearnGlazing.com, *Emerge* Enrollees!

We broke our training into 10 phases to give you a clear path to glazing. Below you'll find a list of courses and a preview of each phase.

Phase 1: Introduction To The Glass Industry And Project Management

Your glass industry initiation. Get a primer on the job flow of typical glazing projects and a glimpse into the daily life of a project manager.

Courses:

- [A Pm's Intro To The Glazing Profession](#)
- [Submittal And Approval Process](#)
- [Project Close Out](#)
- [Initial Project Review](#)

Phase 2: Glazing Systems

Get acquainted with the systems you'll work with every day as a PM. And learn how to choose the right system for the job.

Courses:

- [Glazing Systems 101](#)
- [Storefront System Options](#)
- [Introduction To All Glass Systems](#)
- [Introduction To Sunshades](#)
- [Curtain Wall System Options](#)
- [Introduction To Multi-Span Curtain Wall](#)

Phase 3: Glass Products

This phase is clearly about the glass. Gain intimate knowledge of a wide variety of glass products.

Courses:

- [Glass Product Applications 101](#)
- [Insulated Glass Units](#)
- [Decorative Glass](#)
- [Laminated Glass](#)
- [Common Glass Defects](#)

Phase 4: Shop Drawings & Engineering

You'll be working a lot with shop drawings as a PM. Better spend some time learning how to read them, review them, and avoid common problems and liability issues.

Courses:

- [Introduction To Glass & Glazing Shop Drawings](#)
- [Shop Drawing Liability](#)
- [Building Information Modeling](#)
- [Introduction To Design-Assist](#)
- [Accommodating System & Structural Movement](#)
- [Don't Skip The Shop Drawing Review - A Guide](#)
- [Engineering 101](#)

Phase 5: Ordering Materials

Master the art of ordering materials. This one's all about how to do take-offs and identify the right parts for your fabrication and installation teams.

Courses:

- [Ordering Project Materials - Stock Lengths](#)
- [Ordering Project Materials - Accessories](#)
- [Ordering Project Materials - Glass](#)
- [Ordering Project Materials - Sealant & Backer Rod](#)

Phase 6: Door Hardware

Pay close attention to this phase! Choosing the right hardware can be a matter of life and death in emergency situations.

Courses:

- [Introduction To Door Hardware](#)
- [Door Handing](#)
- [Panic Hardware](#)

Phase 7: Fabrication & Installation

Step out of the shop and into the field. Take a deep dive into the fabrication and installation process to see what happens when glazing materials leave the shop, and learn important lessons like why it might be beneficial to shop glaze your frames.

Courses:

- [Introduction To Fabrication](#)
- [Different Levels Of Fabrication And Assembly](#)
- [Introduction To Shop Glazing Curtain Wall](#)
- [Installation](#)

Phase 8: Extra Credit

Jump start your PM career. Get ahead of the pack and learn about metal panels, jobsite issues, leaks, and much more!

Courses:

- [Metal Panels 101](#)
- [Finding Installation Issues Before Mobilizing On-Site](#)
- [Common Issues Glaziers Face Everyday](#)
- [Educational Resources For Pm's](#)
- [Common Issues That Cause Leaks](#)

Phase 9: Take your Final Evaluation

Test your knowledge and prove your chops for potential employers. [Click here to take your final evaluation.](#)

Phase 10: Preparing for your Interview(s)

Take a refresher on everything you've learned and get your mind in interview shape. You can also take this opportunity to learn from our glazing experts and get advice that will help with your job hunt.
